

Kindergarten Classroom Environment

Submitted by Jel Unger

I have designed my room using two main ideas. Clean and simple as well as nature influenced. All of the room is very neutral. The colour will be added with student work. Curtains are used to hide shelves that can be a distraction and not aesthetically pleasing; and also to soften the classroom windows. Instead of curtain rods I used branches, bringing more of that nature influence to the room. Countertops and cupboards are not filled with clutter. A lot of purging had to happen to achieve this, but it felt and looks so good. The lamp, plants, and water fountain create a warm environment. This is my first year implementing all of these ideas into my learning environment and I am enjoying it every school day.
