

OBSERVING AND DESCRIBING PEOPLE

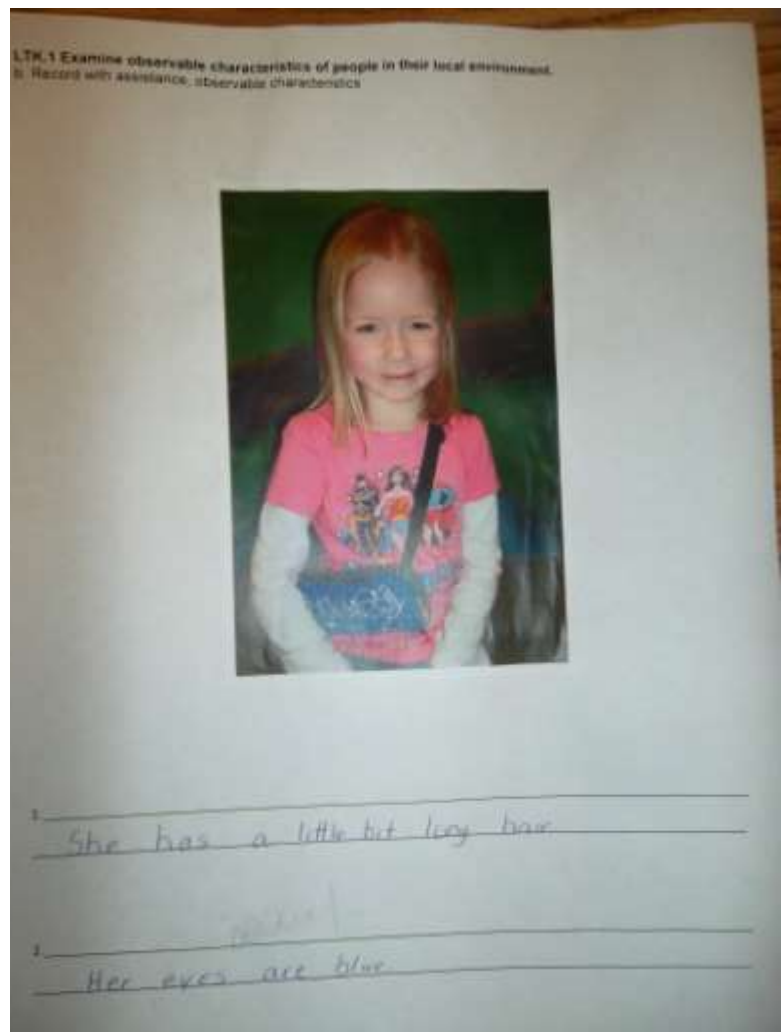

Submitted By Brita Heffernan, Maude Burke School

I used this activity as a summative assessment for the Kindergarten Science Outcome, LTK.1.

LTK.1 Examine observable characteristics of plants, animals and people in their local environment.

b. Record with assistance observable characteristics of plants, animals and people at school, home and the local community.

After practicing describing people and learning the proper terminology to use when describing, students completed the following sheet. Each student had a picture of a different student from the class glued onto the top of the sheet. They then had to observe the picture, and write two descriptions of the student. I came around and transcribed their words.

Name: _____

LTK.1 Examine observable characteristics of people.

b. Record with assistance observable characteristics of people at school.

1. _____

2. _____
