

Is this workshop for you??

Have you ever had a student who doesn't seem to understand how to fit in during play time? Looks everywhere except the book during story time? Does unexpected things to get a reaction from their peers even if the reaction is not positive?

If these situations seem familiar then this session is for you!!

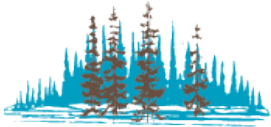

Join us for an exciting day of figuring out the social rules of our classrooms and how to teach them to our early learners.

Ryan Hendrix

Ryan Hendrix is a Social Cognitive Therapist at Social Thinking Stevens Creek in San Jose and a private therapist in San Francisco. She trained and works directly with Michelle Garcia Winner and Dr. Pamela Crooke. Her diverse caseload experience includes pre-school-age children through young adults with varying levels of social cognitive learning challenges.

The Muttart Foundation

Thank you to the Muttart Foundation for support for this Workshop

The Muttart Foundation supports the work of the charitable sector in Alberta and Saskatchewan as well as at a national level. Through its own charitable activities and its funding programs the Foundation works with other funders and charitable organizations to improve the early education and care of young children and to strengthen the charitable sector.

Workshop resumes:	3:00 p.m.
Closing:	4:30 p.m.
Evening session registration:	6:30 p.m.
Session begins:	7:00 p.m.
Networking:	8:30

This workshop introduces professionals and parents to the many facets of development that underlie social learning in preschool and early elementary aged children. What looks like pure fun to us has important social consequences for the developing mind. The ability to participate in collaborative pretend play depends upon having a flexible brain, competent language ability, self regulation, and solid social emotional development as well the executive function skills to multi-task the use of all of the above!! This workshop is designed to provide the background as well as practical ways to teach these skills to our early learners.

10 Social Thinking Vocabulary concepts will be introduced and have been specifically adapted for children ages 4-7: Thoughts and Feelings, The Group Plan, Thinking With Your Eyes, Body in the Group, Whole Body Listening, Expected/Unexpected, Smart Guess, Flexible and Stuck Thinking, Size of the Problem, and Sharing an Imagination.

Objectives

Upon completion of this conference session the participant will be able to identify at least 4 key milestones that underlie the development of social cognitive skills birth to five years of age.

Upon completion of this conference session the participant will be able to explain why a preschool or early elementary aged child with a social cognitive learning challenge may have trouble with collaborative pretend play.

Upon completion of this conference session the participant will be able to discuss the difference between a skills-based approach and a social cognitive-based approach.

Upon completion of this conference session the participant will be able to identify ways to structure collaborative play experiences in preschool and early elementary settings.

Upon completion of this conference session the participant will be able to describe ways to teach at least five Social Thinking Vocabulary concepts to students ages 4-7.
